PERSONAL PROJECTS

Indian Food Restaurant (06/2024 - Present)

- Website is created using frontend technologies (HTML,CSS and JavaScript) where we can book table for dinning at restaurant and website is made using different transform and animation properties and website is responsive also. the whole website shows different types of cuisines, they serve with their menu display on the front page.

Nykaa Beauty (08/2024 - 09/2024)

- Created a website using HTML and CSS only I named my website as Nykaa beauty, I cannot call it a clone because I created it by myself and with my ideas in this website, there are many hyper links attached with the every image placed on the first page user and click on any picture and directly can jump to the page linked for that product. I created this mini project in only five days

Cloth Store Management (03/2024 - 04/2024)

- Cloth store management is made using C++ and its vector library. In this project we can add items and then can display them as a list of items in cloth store with their respective prices.
